Share account access & collaborate instantly, easily and securely

Do you like to grant access of your FedEx, UPS accounts to co-workers without telling them any passwords? When you change a contractor, there will be no need to change passwords of all those sites.

With family members, you can share Netflix, AT&T, Comcast and Expedia accounts without telling any passwords.

<p style="font-weight: bold;">You can check usage statistics of a shared account</p>	<p style="font-weight: bold;">The result is - Work efficiency increased, privacy & security preserved</p>
<p style="font-size: small;">History of shared account of cr-4088072940 in Expedia.com</p> <ul style="list-style-type: none"> 2008-02-03 05:43:14: share w/ june.lovelace@gmail.com 2008-01-08 11:26:15: share w/ xlu3_99@yahoo.com 2007-12-29 11:42:52: share w/ luxue99@gmail.com 	

Mashed Life – Secure Single Sign On, Online Collaboration for Small Business & Family

Log in to your computer and to all web sites with one secure key
Share account access without telling passwords of any web site

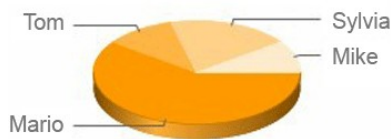

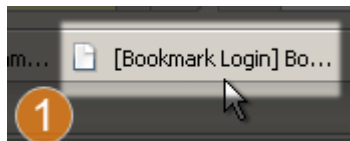

Mashed Life, powered by the secure UmiKey, helps you stay productive and be secured.

UmiKey is essentially a USB crypto key but it does more magic than that. Plug an UmiKey into a USB port of any computer. It opens up the MashedLife.com web site and logs you in securely, without to type in URL or username.

	No software installation, works on any computer, any operating system. No setup is needed. Just plug in and play.	
--	---	--

When using UmiKey to log in to Mashed Life, even if you are on an insecure PC and an insecure network, even the password is stolen by key logging malware, you are still safe. Because UmiKey uses one-time passwords which can be used only once.

The package includes 3 UmiKeys and 5-year Mashed Life VIP membership. Follow the easy steps to get up and running immediately:

1 Plug in the UmiKey, set up your account in Mashed Life. Register your UmiKey under your account.

2 Add or import accounts you want to share or do single sign on. All account information is double encrypted. Only you can decode by your UmiKey. No passwords will be revealed to anyone.

3 Follow the instructions to make the login bookmark, then try to do single sign on to other web sites.

4 2 ways for sharing & collaboration:

(1) Sharing under one Mashed Life account:

Register non-admin Umikeys and give them to employees or family members so they can log in to your accounts of Google, Yahoo, UPS, AT&T, any site to work... without knowing your passwords.

Mashed Life – Secure Single Sign On, Online Collaboration for Small Business & Family

Log in to your computer and to all web sites with one secure key
Share account access without telling passwords of any web site

Access history of last 30 days

(2) Share across multiple Mashed Life accounts:

Ask co-workers or family members to sign up on Mashed Life. Then share selected accounts with them through MashedLife. So they can log in to the accounts without even knowing your passwords.

You can audit usage & sharing history to see who logged in from where.

5

Hand UmiKeys to the co-workers or family members you share accounts with. So their MashedLife logins are secure from key logging malware.
